

LACING INSTRUCTIONS FOR SEDONAS AND OCOTILLO SANDALS

Thank you for purchasing our hand-made Nativearth sandals. Wiggle back into the heel, and let your body heat begin the Nativearth customizing process. After you have set the heel counter you will gain additional length. When first wearing your new sandals, we suggest that you lace them as shown in diagram (A).

After the heel counter has formed, you may choose to lace them as a slip-on by following diagram (B). See other lacing examples on the Ghillies page. We also offer extra laces, and repair services. Keep footbed free of dirt and with occasional cleaning and moisturizing, your Nativearth sandals will give you many years of pleasure.

Square Knot

CAUTION!
 SOLES MAY BE SLIPPERY
 ON SOME SURFACES.

CAUTION!
 SOME LEATHERS MAY
 TRANSFER COLOR.
